

Trade Fixtures, the industry leader in bulk merchandising solutions, offers a full line of gravity and scoop style bulk food merchandising dispensers manufactured in Eastman Tritan™ copolyester that does not contain bisphenol-A (BPA), and other chemicals associated with estrogenic activity (EA).

There are companies claiming to make BPA/EA-free products to profit in the face of fear and uncertainty, but Trade Fixtures has partnered with a plastics industry leading supplier, Eastman, and had our products independently tested to bring certainty and reliability to you and your customers. It's not just making a material change and calling it BPA/EA-free, it's spending the last four years testing, analyzing, and making certain it's what we say it is, and that ultimately it's right for our customers, and yours.

We have taken a very proactive position regarding the BPA question and concerns by being the first to offer a complete line of BPA-free bins. These have been in the marketplace since 2008 and continue to function and outperform our competition. We have, and continue to produce the best bulk food merchandising solutions, and since the very beginning, we have stood behind our products by offering a two year warranty, unparalleled customer service, and industry knowledgeable staff.

The Eastman Tritan™ copolyester balances the properties of easy processing, clarity, toughness, heat and chemical resistance – creating compelling value, requiring less energy consumption, reducing molding and drying time, and withstanding higher temperatures in dishwashers and other environments. In many applications, these combined properties can offer advantages over other materials including polycarbonate.

We have manufactured and sold thousands of bins to leading grocery retailers who've had a BPA/EA-free requirement and while others are experimenting, we're proven.

If you are interested in, or have a requirement for a Bisphenol-A (BPA-free) dispenser, please contact us at 501-664-1318, or via email at cservice@tradefixtures.com. To learn more, you can also visit our website at www.tradefixtures.com

Food Contact Certificate

Products: Trade Fixtures- Tritan bins

Specific items: All Trade Fixtures scoop and gravity bins molded from the Tritan material

Manufacturer: Trade Fixtures, LLC

Material used: Eastman Tritan co-polyester TX1001; approved for food contact to all FDA and NSF requirements
